

CHHAYANKA DABHADKER

B.Tech CSE (AI & ML) | Full-Stack Developer | AI Enthusiast

Durg, India | 9993100769 | chhayankadabhadker17@gmail.com | github.com/chhayanka17 | linkedin.com/in/chhayankadabhadker-b86ab331a

SUMMARY

Second-year B.Tech student in Computer Science & Engineering (AI & ML) with hands-on experience in full-stack web development, NLP-based AI systems, and UI/UX design. Built and deployed a live AI-powered flashcard platform using Python/spaCy, Node.js, and MongoDB Atlas. Hackathon Top 10 finisher with experience in real-time systems and team-based development.

EDUCATION

B.Tech – CSE (AI & ML) Shri Shankaracharya Technical Campus, Durg	2024 – 2028
Higher Secondary (PCM) Guardian & Guide English Medium School, Durg	2024
Class X – AISSE O.P. Jindal School, Raigarh	2022

TECHNICAL SKILLS

Programming: Python, C, C++, JavaScript (ES6+)

DSA: Arrays, Strings, Linked Lists, Sorting, Searching, Recursion — 60-day GFG POTD streak

AI & NLP: spaCy (NER, NLP pipeline), ML Fundamentals, TensorFlow (beginner)

Full-Stack: HTML5, CSS3, React.js, Node.js, Express.js, Flask, MongoDB Atlas, Mongoose

Design & Tools: Figma, Bootstrap, Tailwind CSS, Git, GitHub, Postman (API Student Expert), Netlify, Render

PROJECTS

FlashCraft — AI Flashcard Studio 2026

Python · spaCy · Flask · Node.js · Express.js · MongoDB Atlas · HTML/CSS/JS | University Project | Team of 4

- ▶ Built full-stack AI platform that converts study notes into structured Q&A flashcard decks using NLP — deployed live across Netlify, Render, and MongoDB Atlas
- ▶ Developed Python/spaCy NLP pipeline: sentence segmentation, Named Entity Recognition, and rule-based Q&A generation
- ▶ Implemented 3-tier architecture: HTML/CSS/JS frontend → Node.js/Express API → Python Flask NLP microservice → MongoDB Atlas
- ▶ Features: 3D card flip animation, spaced repetition Got It/Need Review tracking, session timer, and completion summary

Precision Wildlife Drone GCS | Techdivathon — Top 10 Feb 2026

React.js · TypeScript · Tailwind CSS | 24-hour Hackathon · Team of 3

- ▶ Built Mission Planner-inspired Ground Control Station with real-time telemetry simulation and rule-based decision logic in 24 hours
- ▶ Implemented fail-safe landing system, structured event logging, and multi-stage safety monitoring

AR/VR Buyer Verification Tool — Electroverse 2026

HTML · CSS · JavaScript · Figma | Team Project

- ▶ E-commerce fraud detection tool with confidence-based verification logic and full Figma UI/UX design system
- ▶ Live prototype: figma.com/make/0spGjbNv0FMIX9NlzkxPOp/Electroverse

Aadarsh Gram Connect — Rural Analytics 2025

Data Analysis Concept · ML Fundamentals

- ▶ Dashboard concept for rural infrastructure gap detection using structured data workflows and ML-based analysis

CERTIFICATIONS

- ▶ GFG Problem of the Day — 60-Day Streak Challenge (Data Structures & Algorithms)
- ▶ Postman API Fundamentals – Student Expert (REST APIs, API security, testing workflows)
- ▶ Python Programming Fundamentals
- ▶ CSS & Python Complete Course

ACHIEVEMENTS & ACTIVITIES

- ▶ GFG POTD 60-Day Streak — completed daily DSA challenge consistently for 60 days

- Top 10 – Techdivathon (Feb 2026): National-level 24-hour hackathon, drone GCS in React + TypeScript
- University Project — FlashCraft AI Flashcard Studio, SSTC Bhilai
- Prototyping Competition Participant — applied design thinking to build and present a technical prototype
- Technical content creator for student community
